About

Aspiring software engineer currently in my final year at TAMK, enthusiastic about applying my knowledge to real-world projects. Passionate about innovative technologies and eager to contribute to team success through a strong work ethic, attention to detail, and excellent problem-solving skills.

Projects

Time Management Application
React, JavaScript, React Router, JSON Server

- Designed a user-centric application for efficient task management and insightful time allocation analysis.

Musical Notes Customization Application
Java, JavaFX, Maven, UI/UX design

- Created an application for managing and customizing musical jobs with advanced note property controls.

3D Printer Management System
Flask, React, Cloud Integration, Raspberry Pi

- Developed a Raspberry Pi-based system for centralized and remote 3D printer management, utilizing Agile methodologies and Cloud technologies.

Languages

- Chinese (native)   English (fluent)
- Finnish (A2.2)   Japanese (survivable)
